

# Ashkal JL450 - Sealing Layer PE Film Application: Liquid juices / Concentrated powder formulations Suitable with 6-12 mic Al Foil/MPET/PET films

Ashkal JL450 is a specially designed film recommended as a sealing layer for juice packaging liquid or concentrated powder form The design principle includes, but is not limited to its performance on modern high-speed FFS machines. Most modern filling machines operate at high speeds therefore film to metal friction becomes a very critical factor besides the sealing performance at designed sealer temperature, pressure & dwell time. In addition to sealing performance, the real test of the packaging design is in the hands of the consumer. Ashkal JL450 is designed for easy and clean tear without any deformation or elongation of the LDPE layer in the laminate thus avoiding the formation of microfibrous strands keeping the contents safe from any risk of such contamination while emptying the contents from the laminate/packaging.

## **Key Features / Advantages**

- Superior seal through contamination performance Lowers, line wastage/risk of pilferage of product cartons during shipping/storage.
- Fully compatible with any type of lamination with Al Foil/MPET films Aids to enhance O2 barrier leading to the longer shelf life of the product.
- Compliant with all relevant directives on migration and direct food contact issued by EU, UK, US, Canada Your products can be exported to any of these regions.

| PROPERTIES              | TEST METHOD        | TYPE            | Unit              | Typical value |           |         |         |         |         |         |           |           |

Maximum Film Thickness 200mic & TDS available on request.

### STORAGE, HANDLING AND APPLICATION/RECOMMENDATIONS:

Storage must be in a dry environment away from direct sunlight at temperature below 30 oC.

The film will maintain consistent performance over a period of up to 6 months from date of manufacture and should be converted prior to this time. Prolong storage may cause problems of machine ability, function ability or blocking on account of elastic memory of thermoplastic films. Before using this product, customer and other users should make their own independent determination that this product is suitable for their intended use and is solely responsible for all determinations regarding use of the material.

## FOOD CONTACT COMPLIANCE:

Our film fully meets the overall migration requirements and is therefore Suitable for direct food contact and it's comply with EC Directive 94/62/EC, UK Statutory Instrument 2003 No. 1941, As amended, and the CONEG Regulations (USA/Canada).
